Phishing infrastructure automation

VIRTUAL STUDENT FOREIGN SERVICE

V S F S

Project Title	Phishing infrastructure automation
Project Summary	Want to make a difference in information security? Our team conducts phishing engagements and need your help to set up and manage many campaigns at once.
Country	United States
Agency	Homeland Security Department
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	2

Project Description

In this project, you will help develop, discover, and/or automate the technical infrastructure needed to quickly stand up a phishing campaign. This includes the deployment of mail and webservers such that they appear trustworthy and the capability to track clicks and report on metrics.

Applicants should be strong writers, and will most likely succeed if they are an IT generalist with scripting and development capabilties.

Desired Skills Interests

Additional Information

We do things that could get you in serious trouble if you did them on your own! Join an awesome team doing meaningful information security work to be more productive and efficient.
